

Shades of Green

Sustainable, certified, green...three critical words that define an environmental movement and stimulates the demand for more eco-sensitive products throughout every industry. With access to a never ending stream of ecological related information, today's savvy consumers are more educated about the world's environmental concerns and take the opportunity to buy "green" whenever possible. To meet this emerging consumer demand, Conestoga offers green components in a multitude of door designs and accessories including mouldings, veneers, front frames and more.

Whether it's a single kitchen or a large multi-unit project requiring LEED credits, call Conestoga to supply your green component needs.

Finish: Harvest Gold w/Sable glaze

CRP-10161

Specie: Bamboo Finish: Autumn w/Brown glaze

Bamboo This abundant, eco-friendly product is one of the fastest growing plants in the world. Harvested from managed forests, Bamboo regenerates quickly and produces 35% more oxygen than an equivalent stand of trees. More dimensionally stable than most traditional hardwoods, Caramelized Bamboo resists warping and expansion. Meeting CARB standards, panels are assembled using adhesive with no added formaldehyde.
